

High Series 75/30

Professional hand unit for targeted weed control with 100% hot water.

Hot water intake possible!

WEED CONTROL WITH 100% HOT WATER

Best value for money

Environmentally friendly and sustainable

Suitable for all surfaces

WAVE WEED CONTROL

All things considered the best in weed control.

WAVE offers the best value

The WAVE machines have been developed for weed control in the open air. Through the use of hot water in combination with low expulsion pressure, WAVE is suited to all paved and semi-permeable

paved surfaces. Even treatment of artificial grass is possible.

Targeted work can be done with the low expulsion pressure right up to the outer wall without damage being caused.

Benefits of the WAVE High Series 75/30

- Extremely accurate and constant temperature control (around 98°C)
- Can also be used for high-pressure cleaning (e.g. walls, benches and structures)
- Durable and weather-proof
- Weeds stay away longer and are suppressed over the longer term as the plant becomes exhausted
- Constructed extremely compactly, mounting possible on virtually any vehicle
- No foam additive needed (cost-cutting)
- No inconvenience, damage or fire hazard
- Equipped as standard with two hand-held lances for two-man operation
- Ergonomic, light-weight hand-held lances and hoses
- Anti-scale pump to prevent limescale deposits
- Easy to load and off-load with a forklift truck
- Built-in energy supply through diesel engine (no external generator needed)
- Use of surface water possible
- Weed control with high capacity using 100% hot water
- Digital fully automated temperature and pressure setting
- Option of one-man or two-man operation

Standard specifications

- Capacity: 75 ha per season
- 30 litres per minute
- 2,750-5,500 m² per day
- Drive/heating: Diesel
- Working pressure weed control: 0-2 bar
- Working pressure for cleaning: Variably adjustable to 90 bar maximum or 125 bar (option)
- Water temperature: Approx 98°C at the lance
- Burners: 2 (diesel)
- Burner tank capacity: 80 litres
- Tank capacity: Diesel engine 40 litres
- Emissions class of Kubota diesel engine: STAGE IVb
- Emission class high efficiency heating boilers: > EURO 6
- Water tank capacity: Plastic 1,000 litres, larger and smaller tank options installed as desired
- Temperature control: Electronic (digital touchscreen)
- Colour: RAL 5010 (base) and RAL 9006 (hood)
- Hose: 2 x 15 metres (3 x 15 m extension possible)
- Hose extension: Up to 60 metres maximum
- Hot water reels: Two built in, stainless steel, 100° Celsius
- Hand-held lance: Two with 20-cm hot water weeder
- Weight: 585 kg
- Dimensions (l x b x h): 1,351 x 1,001 x 1,314 mm

Options

- Surface water pump: Wacker PG2 pump incl. special filter, five-metre suction hose with float
- Hand-held lances: 20/40/80-cm hot water weeder with wheels
- Cleaning lance with washing brush
- Dirt blaster
